## General Purpose Air Operated Conveyor Lubrication System

**Simple, yet effective clean precision lubrication for all types of conveyor systems.**

### Features/Benefits

- Integral heavy duty 5 gallon steel reservoir
- Lubricant level sight gauge
- Positive displacement metering pump
- Up to 12 individual lubricant outlets
- Proximity sensor or air operated trip device
- Extends the "useful operating life" of conveyor components and systems
- Lubricates during production
- Reduces maintenance costs
- Reduces conveyor downtime
- Reduces power consumption
- Precision lubrication reduces waste and contamination
- Eliminates conveyor surge
- Reduces undesirable noise
- Wide viscosity range capability provides flexibility in lubricant selection
